

I am writing you tonight to ask you to reject the NAB petition 04-160. I am a subscriber to satellite radio. The broadcasters shouldn't be able to dictate the programing I listen to. I live in a rural area, the reception is not always good, plus the programing they (NAB) have usually leaves something to be desired. Please do not allow the NAB to shelter themselves claiming that satellite radio is damaging them. I pay for the programing i like on satellite radio. thanks
